

# WuduMate®

## WuduMate Compact (Porcelain) - Installation Guide

- Locate WuduMate Porcelain Fixing Kit

- Place the WuduMate into its intended fixing position
- Mark the position of the WuduMate on the floor together with the locations of the fixing holes in the sides of the unit
- Remove the WuduMate
- Secure the multi-position fixing kits to the floor with appropriate floor fixings either side of the unit to line up with the inside wall of WuduMate when placed into position.
- Install the faucet/tap and TMV if being used; there is space in the back of the WuduMate for the TMV; (flex pipes are provided with the WuduMate Manual Lever Pillar tap/faucet)
- If installing a WuduMate Pillar tap with ½”BSP connection, there is a converter to North American standard of ¾” NPS available from WuduMate
- Install waste/trap in the WuduMate and connect to mains drainage system  
*(Suggested plumbing tip - raise the unit 100mm on blocks to make connections)*
- When the waste/drain is installed in the WuduMate, the direction of the outlet is towards the back of the unit, but this could be turned with a 90 degree bend down through the floor to be picked up perhaps in the ceiling void below.

# WuduMate®

- Lift the WuduMate into position and secure, screwing through the holes into the multi-position fixing kits, inserting screw end covers when complete
- Seal around the WuduMate with silicone sealant (depends on wall and floor surface)
- Polish with a non-abrasive cloth
