

WuduMate®

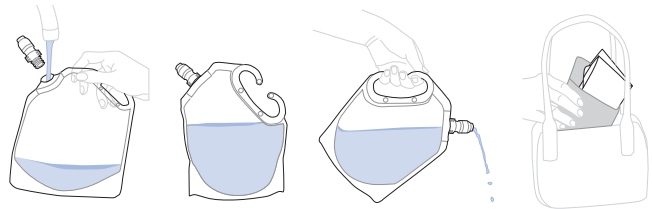

PERSONAL

"...the WuduMate solves the ageold problem that faces new age Muslims – how to wash properly after using public toilets so you can perform wudu (ablution) and pray."

WuduMate® inventor – Moazzam Ali

- Easy to fill with up to 600ml of water
- Pours accurately reducing spillage
- Self-sealing, brandable pouch
- Personal and hygienic
- Folds away neatly until next time
- Cost-effective – use again and again

"I don't always have a mineral water bottle to hand when I want to wash and taking cups of water into a toilet is not always practical, so the WuduMate-P is ideal. It can easily be carried in your pocket or handbag, and after use, it can easily be folded away until next time."

"Repeated use of a water bottle or a lota in the toilet is really unhygienic, ...especially with COVID around!"*

"...every kid should have a WuduMate"

* A lota is a common-use jug to hold water in the toilet, available for everyone to use.
