

## WuduMate Compact (Acrylic) Cleaning and Maintenance Recommendations

### WuduMate Compact Bowl

- The WuduMate Compact is made from high-quality sanitary grade acrylic, and should be cleaned and maintained in a similar way to other acrylic items found in the home, such as baths and shower trays.
- Cleaning should be undertaken with normal NON-SCOURING (i.e. non-abrasive) cleaning agent or detergents and a soft sponge or cloth.
- In areas of hard water, lime-scale can be removed by using normal NON-SCOURING household lime-scale removers as can be found in a number of household detergents.
- Scratches can be removed in the same way as they are removed from the bodywork of motor cars, using T-Cut scratch removers, finished with liquid polish. To recreate a shine, once the unit is free of grease/dirt/lime-scale, polish thoroughly with T-Cut, and/or a fine sandpaper - 600 grit or higher.
- If over time neglect causes the WuduMate to lose its gloss, the original shine can be largely (if not fully) recreated by buffing/polishing with a dry cloth, or mechanised drill based polisher or buffer.

### Wudumate Compact Stool

- On receipt of the WuduMate Compact it is recommend that the chromed finish of the stool is cleaned thoroughly with a chrome cleaner (such as the UK Brasso brand) to remove any particles which might have collected on the item during transportation, since these can cause corrosion.
- Periodic cleaning with a suitable chrome cleaner will bring a nice shine to the chrome and will offer a degree of protection against corrosion.
- The chromed stool should not be left in contact with water for any length of time, since even can cause corrosion. Ideally the stool should be kept dry, under floor heating under the stool location can help protect against corrosion.
- Care should be taken to avoid any cleaning materials used on the floor or used on the acrylic bowl to come into contact with the Compact stool since cleaning materials often contain aggressive chemicals which CAN and WILL inevitably cause rust and corrosion.
