

WuduMate Compact (Porcelain) Cleaning and Maintenance Recommendations

WuduMate Compact Bowl

- The WuduMate Compact bowl is made from high-quality porcelain, and should be cleaned and maintained in a similar way to other porcelain items found in the home, such as basins and toilets.
- Cleaning should be undertaken with normal, household, NON-ABRASSIVE cleaning agents or detergents and a soft sponge or cloth.
- In areas of hard water, lime-scale can be removed by using normal household lime-scale removers as can be found in a number of household detergents.

Wudumate Compact Stool

- On receipt of the WuduMate Compact it is recommend that the chromed finish of the stool is cleaned thoroughly with a chrome cleaner (such as the UK Brasso brand) to remove any particles which might have collected on the item during transportation, since these can cause corrosion.
- Periodic cleaning with a suitable chrome cleaner will bring a nice shine to the chrome and will offer a degree of protection against corrosion.
- The chromed stool should not be left in contact with water for any length of time, since even can cause corrosion. Ideally the stool should be kept dry, under floor heating under the stool location can help protect against corrosion.
- Care should be taken to avoid any cleaning materials used on the floor or used on the acrylic bowl to come into contact with the Compact stool since cleaning materials often contain aggressive chemicals which CAN and WILL inevitably cause rust and corrosion.
