WuduMate Mobile

Product Code WM-MOBILE

The WuduMate Mobile is a compact and moveable appliance for safe and comfortable wudu, the Muslim pre-prayer ablution ritual. The discreetly hidden handle and wheels facilitate easy moving from room to room.

Not necessitating installation, the WuduMate Mobile is suitable for small domestic spaces, rental properties and any commercial building where a permanent wudu facility is not practical, including: offices, hotels, student accommodation, hospitals, nursing homes, police stations and prisons. This mobile appliance is also ideal for Muslim weddings, exhibitions, and other events. The WuduMate Mobile can be used in any setting where there is insufficient room for a permanently plumbed WuduMate, where temporary wudu facilities are required, or where the end users are unable to access an ablution room, such as in a hospital or category A prison.

The WuduMate Mobile comes complete with:

- Retractable stool and bowl
- 14-litre upper reservoir which can either be removed and taken to a water source for filling, or wheeled to a water source
- 14-litre lower reservoir which can either be removed and carried to a basin/drain for emptying, or wheeled to a basin/drain and emptied with optional internal pump and hose
- Tap with 0.5 litre per minute aerator giving approximately 14 minutes running water for wudu before needing to be emptied and refilled

Colour Marble

Material Unit: HDPE Plastic, Stool: Stainless Steel
